

GDPR Update from Proactive Education

General Data Protection Regulation (GDPR).

We are registered with the Information Commissioners Office (ICO)

We have a nominated & dedicated data controller

We have a policy that supports and demonstrate compliance

When collating 'personal information' it's updated directly onto a CRM, paper copies are destroyed

We have installed security tags on all live laptops being used by Proactive Education

GDPR – Our Top Tips You Can Implement!

Collect data for a specified, explicit purpose and use for that purpose only

Only keep identifiable data for as long as necessary

Keep data accurate and up to date, don't lose, break or damage it

Set up a process for any future data collection to ensure consent is given and recorded correctly

Obtain data that is adequate, relevant and not excessive and match them with your products or services

Ensure 'opt in' and 'opt out' options are on your email accounts to give choice

Contact your CRM provider or any other partners you are affiliated with, who are involved in your database management, as they will be making changes to comply

Preparing for the General Data Protection

Regulation (GDPR) 12 steps to take now

Subject access requests

provide any additional information.

You should update your procedures and plan how you

will handle requests within the new timescales and

Lawful basis for processing personal data

processing activity in the GDPR, document it and

You should identify the lawful basis for your

update your privacy notice to explain it.

You should make sure that decision makers and key people in your organisation are aware that the law is changing to the GDPR. They need to appreciate the impact this is likely to have.

Information you hold

You should document what personal data you hold, where it came from and who you share it with. You may need to organise an information audit.

Communicating privacy information

You should review your current privacy notices and put a plan in place for making any necessary changes in time for GDPR implementation.

You should check your procedures to ensure they cover all the rights individuals have, including how you would delete personal data or provide data electronically and in a commonly used format.

ico.org.uk

You should review how you seek, record and manage consent and whether you need to make any changes. Refresh existing consents now if they don't meet the GDPR standard.

You should start thinking now about whether you need to put systems in place to verify individuals' ages and to obtain parental or guardian consent for any data processing activity.

You should make sure you have the right procedures in place to detect, report and investigate a personal data breach.

Data Protection by Design and Data **Protection Impact Assessments**

You should familiarise yourself now with the ICO's code of practice on Privacy Impact Assessments as well as the latest guidance from the Article 29 Working Party, and work out how and when to implement them in your organisation.

Data Protection Officers

You should designate someone to take responsibility for data protection compliance and assess where this role will sit within your organisation's structure and governance arrangements. You should consider whether you are required to formally designate a Data Protection Officer.

If your organisation operates in more than one EU member state (ie you carry out cross-border processing), you should determine your lead data protection supervisory authority. Article 29 Working Party guidelines will help you do this.
